

## Principles and Values for Mission in a Community

1. Integration—intellectual, physical, spiritual, emotional, relational
2. Prevention over cure
3. Multiplication with and of training: outside help is in the role of encourager, catalyst, advisor, trainer, co-learner, not doer or leader
4. Community ownership: local identification of strengths and problems
5. People-centered, not technology or program centered
6. Sustainability: go slow to go fast
7. Sensitive adaptation toward relevance and success
